### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a communication with Ms. Sarah E. Smith (Reg. No. 50,488) on 04/13/06.

The application has been amended as follows:

In the specification:

Page 6, line 26, "center component 64 is tubular in shape (as shown in cut-away sectional view)" has been changed to --center component 64 is tubular in shape--.

In the claims:

Claim 6 has been cancelled.

### *Reasons for Allowance*

2. The following is an examiner's statement of reasons for allowance: The claims are allowable because prior art fails to teach that the tool device is mounted on a tool base that is detachably mounted to the top surface of the table by releasable securing means, as set forth in claim 1.

Regarding claim 1, Stoll (4,939,869) teaches an attachment assembly for mounting to a conventional bench saw including a frame, a work supporting table on the frame displaying an opening therethrough and a pair of longitudinal grooves on a top face thereof. Stoll also teaches a movable structure mounted to the frame and carrying a power-operated shaft and

Art Unit: 3724

means on the frame for causing vertical displacement of the shaft relative to the table. Stoll also teaches a tool base detachably mounted to the top face of the table. Stoll also teaches a tool device including a tool shaft and transmission means operatively connecting the tool shaft to the power-operated shaft. Stoll in view of Wiley (4,516,612) teaches a pair of longitudinal grooves in the top surface of the table and releasable securing means fixed in a pair of grooves connect to tool base for mounting the base to the table. However, Stoll in view of Wiley fails to teach that the tool device is mounted on the tool base that is detachably mounted to the top surface of the table by releasable securing means as set forth in claim 1.

None of these references by themselves or in combination with the other prior art cited teach the claimed invention set forth in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Comment*

3. In view of the amendment to claim 1 and cancellation of claim 6, rejection of claims under 35 U.S.C. 112, second paragraph, and objection to the drawings under 37 CFR 1.83(a) are withdrawn.

Originally drawings (Figs. 1-13) have been accepted due to the cancellation of claim 6. However, amended Figs. 3 and 4 submitted on 12/27/05 introduce new matter. Therefore, amended Figs. 3 and 4 submitted on 12/27/05 have not been entered.
